-

EXPERIENCE

Senior Mobile Engineer

Infodevelopers Pvt. Ltd., Lalitpur

May 2025 - Present

- Working on banking/offline-first applications and guiding junior/mid developers to write scalable/clean code.
- Implementing native Android/iOS functions into existing Flutter code.
- Maintaining an existing React Native application.
- Created scripts for automation for APK generation, generating platform channels, and managing flavor-wise APK/app bundles.

Mobile Developer (Part-time)

Birsingh Technology Pvt. Ltd, Remote

May 2025 - Oct 2025

- Created a fitness tracking application with Firebase, Firebase Cloud Functions and Flutter.

Lead App Developer

Bhawani Infotech Pvt. Ltd., Kathmandu

Dec 2023 – Feb 2025

- Developed scalable applications in e-learning, e-commerce, and time management using clean architecture

with Bloc, GraphQL, and Isar.

- Created reusable components and automated CI/CD workflows using GitHub Actions and Xcode Cloud.

Flutter Developer

Skill Sewa Pvt. Ltd., Kathmandu

Feb 2023 – Dec 2023

- Built in-house applications with custom components, multi-threading (isolates), and state management (Bloc, Riverpod).
- Integrated payment gateways (Khalti, eSewa).

Junior Flutter Developer

Easy Software Pvt. Ltd., Kathmandu

Jun 2022 – Feb 2023

- Collaborated closely with senior developers to develop a school management system.
- Enhanced skills in push notifications, state management (Provider, GetX), REST API integration, error handling, and offline threading with SQLite.

EDUCATION

BSc (Hons) in Computing

The British College, Kathmandu

Sept 2017 – Sept 2021 (Graduated with 1st Class Honors)

PROJECTS

Pfitt (Personal Fitness Trainer)

- Built a role-based app with Firebase and Flutter using BLoC architecture.
- Platforms: [Android](#)

Scrollable Tab Controller

- A Flutter library that simplifies the implementation of scrollable tab views, enhancing UX for applications requiring dynamic tab layouts.
- Available on [Github](#)

Connect Shift – Roster Management System

- Built role-based roster management system with real-time notifications, deep linking, and job tracking.
- Integrated Google Maps and geofencing for clock-in/out
- Platforms: [Android](#), [iOS](#).

Medhavhi – E-Learning Management System

- Built a multi-tenant e-learning system with offline sync for videos and attendance, online quizzes, assignments, a gallery, community, doubts, events, notifications, lesson plans and resource downloads.

- Written native Swift and Kotlin code to disable screenshots/video recording while taking quizzes/exams.
- Platforms: [Android](#), [iOS](#).

Dohans MTA – E-Commerce Application

- Created E-commerce app for mobile accessories using Firebase and Shopify. Wrote custom Shopify queries and integrated biometric login.
- Platforms: [Android](#).

Easy School – School Management System

- Built role-based school management system featuring attendance, payments, and academic tracking.
 - Used flavours to create multiple school apps using same code
 - Platforms: [Android](#), [iOS](#).
